SELF HELPS for the **NEW SOLDIER** By a United States Army Officer

richt, 1817, by the Whenler Syndicate, Inc.) TURNING THE SQUAD COM-

PLETELY ABOUT. We now return to the squad for further instruction therein. "Squad right," which was explained in the thirteenth article of this series, is at once a movement so difficult and so important-important as the basis for chang-

ing the front of a platoon or company that it would be beneficial to go cver it again in preparation for "squad right In "squad right," the right may en

the front rank, at the commerce "MARCH!" faces to the right in matthing and marks time. He must cerre absolutely to advance until the merement is completed. If he inches firward, he then ceases to be a "fix'o pivot;" and unless "squad right" is pe ~ formed upon a fixed pivot, the squacwill not fit together properly when s column of squads swings into a company front. If, however, the pivot man turns upon the fixed spot and marks time, as he should, the various squads in company front will slip into pince like boards with tongues and grooves.

At the command of execution, "MARCH," the three other front-rank men oblique to the right, place themselves abreast of the pivot man, and mark time. They do not stumble into position in loose and sagging circles. Each of these movements should be precise and military. Otherwise, the squad formation will be as slack as the movement of the slackest man.

In the rear rank, the third man from the right (No. 3, in the "count off"). followed in column by Nos, 2 and 1, moves straight to the front until he finds himself immediately to the rear of his front rank man. Nos. 2 and 1 place themselves behind their front rank men likewise. Then all face to the right in marching and mark time. The other man of the rear rank-No. 4-moves straight to the front, at the side of No. 3 for four paces and places himself abreast of the man on his right. Each man, as he reaches the new line, glances toward the marching flank-that is, those still to come on to the new line-while he marks time, and when the last man arrives on the line, both ranks proceed with "forward march" without further command.

For the guidance of the squad xembers, the movement has been worked out in six counts-at the quick time cadence of 120 steps a minutefrom the command "MARCH." In other words, if each man will perform his appointed task while counting six, including the marking time, the squad will be ready to advance in the new direction upon the sixth count.

"Squads left" is, of course, executed as above with the fourth man in the front rank as the fixed pivot. Now, in order completely to reverse the front of a company and the direction of march, "squads right" (left) about" is executed. At this command, the pivot man (No. 1, front rank) executes "squad right" twice. He does not, however, make this a sloppy merger of the two, but starts the second "squad right" when the last man in the front rank on the first 'squad right" has arrived abreast of

in two distinct counts of six.

The front rank moves then, as in "squad right." The movement of the rear rank, however, is somewhat different from the same rank's task in "squad right," and this difference should be carefully noted. Thus, in the rear rank, the third man from the right-No. 3followed by No. 2 and No. 1 in colump, moves straight to the front until on the prolongation of the line (40 inches in the rear of the front rank) to be occupied by the rear rank; changes direction to the right; moves in the new direction until he, and Nos. 2 and 1 also, are each in rear of his respective front rank man, when all face toward the right in marching,

marching flank. The fourth man marches on the left of the third man to his new position, and, as he arrives on the line, both ranks execute "forward march"-on the second count of sixwithout further command.

EXTENDED ORDER.

Everything we have taken up so far from "the school of the squad" except 'take interval" and "take distance,' has been "close order" drill.

Close order is necessary for marching, parade and disciplinary purposes, but in modern warfare-that is, outside of a trench-a squad fights in extended order. Even in a trench, the principle of the extended order is maintained; that is to say, the distance between rifles is approximately the same as when deployed on its skirmish line. Of all the great armies in Europe, the Germans alone at the present time send troops into battle in close order.

that their casualties are appalling. Extended order, on the other hand, a characteristic of American troops, is also uniformly practiced by the allied armies. The purpose of extended order is so to distribute the men of a squad that they may work in unison and without serious reduction of the amount of fire which can be delivered from a single section of the line, but which at the same time leaves sufficient space between them to minimize the chances of their being hit.

Even a machine gun would not unnihilate a squad in extended order places in the squad.

quite so expectiously as it could dis-pose of one in close order. For not only loes the extended order separate the teen, but in that degree increases their chances of escaping bullets, but it also affords them infinitely better chances of finding cover while advancing.

To deploy "as skirmishers," which is the descriptive command for extended order drill, the corporal at the command of execution, "march," springs in front of the squad, if he does not occupy that position already. At a run, the other members of the squad place themselves abreast of the corperal at half pace intervals. Since a pace is 30 inches, there is 15 inches of space between men so deployed, in-

stend of the four inches of close order. No. 2 of the front rank springs to the corporal's immediate right. No. 2 was a girl. of the rear rank takes station to the immediate right of No. 2 front rank. No. 1 front rank is on the immediate right of No. 2 rear rank, and No. 1 rear rank on the right of No. 1 front rank. On the corporal's immediate left is No. 3 rear rank, who has No. 3, front rank, on his left, while on No. 3 front rank's left is the remaining member of the squad, No. 4 rear rank. In other words, with the exception of No. 4 rear rank, in extended order the rear rank men all place themselves on the right of their respective file leaders, and each front rank man, in springing to the side of the corporal, leaves room for the rear rank man of the same number to step into his prop-

If there are any extra men in the squad (which sometimes happens), they fall in at the left of No. 4 rear rank, or at the extreme left of the skirmish line. In moving, the entire line conforms to the corporal's gait, whether that be route step, double time, or still fuster running. Deployed as skirmishers, a squad does not keep step; but it must take pains to see that a space of 15 inches is maintained between each man. A common error is for the men to bunch after a few steps forward have been taken.

er position in the skirmish line.

Inasmuch as the normal interval be tween skirmishers is one-half pace, or 15 inches, each man has practically one yard of front. The front of a squad thus deployed is ten paces, or

WHEN THE SQUAD IS ACTING ALONE IN EXTENDED ORDER.

The squad in combat drill is what might be called a subsidiary first unit. The squad is not the regulation first unit-this is the plateen (ene-fourth of a company roughly speaking), as will be explained later. But within a platoon, a closer fire control is often necessary, and to this the squad organization is adapted. Particularly is this ssential to "firing by squads" which is, under certain circumstances, the most effective way in which the fire can be delivered.

In addition, the squad is a most practicable unit for patrol and outpost duty, since it places a small and flexible body of men in charge of a noncommissioned officer for work which requires discretion and concealment. This is not to say that patrol or outpost duty is confined to squads, but it is often subdivided finally upon the squad basis. In any event, the squad in extended order work of all kinds has many occasions to work independently, and it is then that the discipline and sense of unity acquired in close order drill will justify itself, as well as obedience and attention to the rank. They execute the movement the corporal.

ing alone, the skirmish line is formed mittee of which I was chairman. in the same way upon No. 2 of the front rank. No. 2 stands fast in his place or continues the march, as the case may be. Meanwhile, the corporal places himself in front of the squad when advancing, and in the rear when halted. When he is in fine, the corporal is the guide; when he is not in line-that is, when he advances in front of the squad as its commander-No. 2 front rank is the guide of the line, and it is the duty of No. 2 front mark time, and glance toward the rank to follow in the tracks of the corporal, with the rest of the squad guiding on No. 2.

The command for assembling the squad may be given either as "Assembly, MARCH," or by the corporal's waving his arm in short circles above his head. At the command, the men move toward the corporal, wherever he has taken his station as a base, and form upon him, in their proper places, in close order. If the corporal continues to advance, they move in double time, form, and follow him. The assembly, while marching to the rear, is not executed.

It will be seen that in deploying as skirmishers, the precise form of movement prescribed for close order drill is not adhered to. A man has more case and latitude in carrying out the movements. This is to make speed. While men in close order are compelled to turn corners sharply and maneuver, so to speak, in angles, in extended order it would be inefficient for a man to turn on an angle to reach his or "massed formation," with the result position when he could make a straight cut for it.

Yet this in no sense nullifles the need for precision in close order drill. without it troops would become hopelessly tangled up, and without it also there would not be the uniformity of movement which would cause members of a squad in extended order instinctively to choose the most direct-and in that sense, precise-short-cuts in the least possible time. In fact, without the close order, they could make no short cuts at all, for they would not know where to turn in order to find their

Proving That All Flirtations Are Not Wrong

ASHINGTON.—Two women young enough to have birthdays were confabbing in a car. One held a lace-swaddled infant. The other placed her heavier youngster on the seat beside her, and turning to her companion eft the baby to look out for itself. And

the baby did. It started a flirtation which proved, of course, that the baby

She went for the man of her choice with a directness that caught the astonished interest of every passenger in the car-except her mother, who was too busy talking to notice the romance going on behind her back. The man sat below the baby with a vacant seat between. He was a shabby man with mud on his shoes and an all-over look of being out of a job. He accepted the young person's advances with a

luck as well as a guilty conscience makes cowards of us all-and when she had tugged at the maternal hand until she could slide across the vacant space and snuggle up to him the man shrank away. The baby snuggled closer and A prosperous citizen across leaned over to cluck confidentially to Juliet and to congratulate Romeo on his conquest. Perhaps the prosperous one recognized that there must be something worth while in the hidden depths of

smile that seemed shy of asserting itself-Shakespeare forgot to say that bad

a man-never mind the muddy shoes-who could attract the confidence of a baby, still wise with the inscrutable knowledge it had brought into the world with it. For when the mother, suddenly conscious of her offspring, gasped to find its white embroideries fraternizing with tramp humanity and whisked it to her lap, the citizen took the vacated seat and said some kindly triffe, Romeo, doubtless encouraged by the victorious fact that he had just figured up as a lady killer, and feeling, maybe, that the man who spoke the

kindly words must have a kindly heart to back them, made apologetic reference to having walked from tidewater Virginia looking for work. That was all there was to it, except that as one passenger got out she

ondered if-if: The man who wanted work and the man who looked as if he could give it had been brought together purposely.

And if it had been intended that a little child should lead them.

Speaker Receives Belated University Degree are years.

CHAMP Clark, for a plain, homespun American, has a terrific lot of alphabetical disarrangements after his name. For one thing, he is an LL. D. three times, and LL. D. raised to the third power certainly presupposes a large amount of knowledge. One of these

ago, nearly half a century after he had been fired from Kentucky university. It came about in this way: Two men jumped on the young Beauchamp Clark when he was in his senior year and were giving him considerable of a pounding. Clark was mad and in his rage endeavored to puncture one of his assallants with a shot from an oldfashioned pepper-pot pistol. This

scrap resulted in Clark going before the faculty, which was evenly divided for and against expelling the boy. The president of the university was absent, and the man acting in his place had a son at the school who would be in line for honors if Clark, who was nearly top man, should be fired.

Well, Clark was fired; but when the president of the university returned he revoked the order, but Clark was sore then and had left for good. He went to Bethany college, and did the junior and senior years in one. When he graduated he had an average of 99.98 per cent, and the missing two-tenths of 1 per cent came about because he contracted indigestion eating corned beef and cabbage at one dinner in midterm. This little illness set him back just enough to put him two-tenths to the bad on one of the monthly exams,

Kentucky university, however, failing to give the speaker a diploma at the time he should have had it, increased the degree and sent it to him at the last commencement.

Lesson in Poor Widow's Gift to the Red Cross

THE intense and widespread interest in the work of soliciting funds for the Red Cross, among all classes, is thus impressively described by Mrs. Mary When the squad is deployed with Katherine Hansbrough in the Tampa Tribune: "I read in the morning paper

of Morgan's gift of a million dollars to men place themselves abreast the cor- the Red Cross fund in New York city poral at half-pace intervals, as we and I compared it to a gift made in have seen, but when the squad is act- Tampa to the Woman's Red Cross com-

"We were working the very poorest district of Tampa, where the struggle for existence is a raw tragedy, where the contributions, willingly made from the necessities of life, were nickels and dimes. In an ill-kept cottage, bare of furniture and every sem-

blance of comfort, I found a woman and three children. Her shoulders were bent with labor, her hands were hardened with toll, her hair streaked with the gray of sorrow and poverty, but her eyes were still alight with human sympathy. I talked to her a bit about my mission and the soldier boys we were sending away from the America they loved so well. Her eyes filled with tears and she asked wistfully:

'Would you let me give you two cents? It is all I have and I would like to feel that I have helped some soldier even such a little bit.' "Suddenly I was carried back 1900 years to a temple in Jerusalem,

the millionaires making their gifts and the widow casting in her mite and heard the voice of the Master: 'She hath cast in more than they all.' "The two cents may not buy comfort for a wounded soldier but the influnce of its loving bestowal should touch every heart."

Prominent Women Furnish Hospital Equipment

MRS. WOODROW WILSON, wife of the president, and Miss Helen Wood-row Bones, a cousin of the president, have turned over to the American Red Cross four dozen pairs of pajamas and an equal number of sheets and pillowcases which they have made

with their own hands. This "bit" of personal service by the wife of the president is an illustration of the work which women of the cabinet and others prominent in official life are doing as an inspiration and example to thousands of others.

Several women of the cabinet, be sides giving sons to the service, also have taken the lead in organizing groups of women to sew on base hospital equipment. Mrs. Thomas R. Mar-

shall has organized the wives, daughters and sisters of senators; Mrs. Champ Clark has been active in congressional circles; Mrs. William G. McAdoo has organized women employed in the treasury department; Mrs. Franklin K. Lane, assisted by the wives of bureau chiefs, has been leading woman employees of the interior department in conducting sewing circles and first-aid

Ellot Wadsworth of the war council of the society, in forwarding the gar ments made at the White House, said: "The American Red Cross sends this special shipment at the request of Mrs. Wilson to evidence her active and nost practical interest in the work of mercy and relief carried on by the Red Cross societies. We trust that the shipment will reach you safely, as it carries with it such cordial good wishes from the immediate family of the president of the United States."

ALASKA STIRRED

Indians Are Circulating Wild Stories of Mysterious Hap-

penings.

BLIND MAN IS WITCH

Daughter Tells of Flying by Night and Peering Into Graves-Federal Authorities Forced to Take Matter Up.

Juneau, Alaska,-Witchcraft has yesterday." come back to Alaska. The Indians are circulating tales of mysterious happenings. It has reached the point where the United States government has been forced to take official recognizance of the witch terror. In the district court here J. A. Smiser, federal attorney, has questioned many witnesses.

A complaint of the practice of witcheraft among the natives of Killistoo was made some time ago to W. G. Beattle, superintendent of native schools for Alaska. An Investigation in the Killisnoo village led Superintendent Beattle to bring a number of the tribe to Juneau for examination by District Attorney Sudser, with the resuit the witch was found, but no law could be found on which to base a complaint against him.

Blind Man Claims Honor. From the testimony of the witnesses examined before the district attorney. the story of the witchery centers

around a blind man, his fifteen-year-old daughter and her grandmother. For several months the blind man has been announcing himself as a witch, and has claimed responsibility for practically all the deaths that have occurred in the village of Killisnoo for the past

According to the story of the little pative girl, Mary Moses, or Klan-tosh, as her Indian name is, the first time she knew that her father was a witch was one night a "long time ago" when she was awakened in her sleep and felt cold. She called her father and asked him for more covers, which he brought, and while covering her over, she says,

He Told Her He Was a Witch.

he told her for the first time that he was a witch and that he wanted her to learn to be one, too, in order that she might carry on his work when he dled.

In order that she might learn the secrets of the practice she said her father told her she must visit with him an old graveyard across the bay. Mary stated her father told her to take hold of his foot and in a moment they "flew" across the channel to the cemetery. While there she said they were able to look through the earth down into the graves, and could see the bodies in After wandering about the them. graves for a time her father transformed himself into a white duck and on his back she says she rode back across the channel. Mary told the district attorney that that night she learned many things about witchcraft.

Fears for Grandmother. The girl's story was told with straightforwardness and without contradiction, and the reason she said she wanted something done with her father was because she feared he would kill her grandmother with witchery. The child's mother is dead and she is apparently very fond of her grandmother, and is evidently sincere in her fear of her father's power.

The only charges against her father are based upon the firm belief that he is a witch, and in that connection he is accused of being responsible for everything in the way of misfortune which has happened in the Killisnoo Indian village. In the eyes of the law, Mr. Smiser says, it does look a little like hypnotism, but nothing tangible has occurred which can be reached by law.

MUST GIVE PIG DAILY BATH

Only Condition Under Which Portland Man Can Keep Animal in City Limits.

Portland, Ore .- George Green of this city must bathe his pig every day. The council has granted him permis sion to keep his pig within the city limits if he will give the young porker a daily bath and keep it perfectly clean. Green promised to wash and scrub his pig daily, so that he may have pork for his family this fall.
